OBJECTIVE

Talented game designer and engineer with excellent communication skills and Steam release experience, looking to establish myself within the game development industry, and to further improve my skills as a game designer.

EDUCATION

Fitchburg State University — *BS in Game Design, Minor in Computer Science*

December 2021

EXPERIENCE

KnobCat Games, Remote — *Contract Programmer*

2022-ongoing

- Expanded upon an already existing codebase and added on to the games framework
- Worked on and expanded upon the UI, animation, data handling and gameplay features
- Refactored and commented the original codebase to improve readability and performance
- Implemented networking systems using Playfab including servers/multiplayer, inventory, microtransactions and save systems
- Conducted bi-weekly dev logs to showcase work and current progress
- Used Steamworks API to implement features such as achievements, microtransactions and data linking between [Steam](#) and Playfab

Cramits Keep, Fitchburg — *Programmer and Designer*

2021

- Player mechanics and animation controller
- level/room generation and mechanics including transitions, level streaming and enemy spawn systems
- Tool development for simplifying level creation for the level designer
- Menu and UI systems including settings and statistic tracking
- Boss design and implementation including AI, animation controller and mechanics
- Assisted team members in releasing the game on [Steam](#)

Amazon Sortation Center, Milford — *Sorter*

2021

- Worked in a variety of stations to sort and ship packages
- Organized, prepped and loaded packages for delivery in a fast-paced work environment
